

Photomontage 01 - Campsite Photomontage from Puggoon Road

Photomontage is to be viewed at an arms length from the image to gain the best impression.

Note:

- The photograph captured as the basis for this photomontage was taken on a full frame Digital single-lens reflex (DSLR) camera using a 50mm focal length representing a 39.60 horizontal field of view (HFoV) and a 270 vertical field of view (VFoV). This specification is regarded as providing a depth of field that is closest to human eyesight, albeit that we typically have wider peripheral vision.
- Accurate representation of this photograph or photomontage is achieved when printed at A3 size or by viewing at 100% zoom on a 20 inch monitor at a distance of approximately 400mm.

This bar is 10cm when printed
